# AIR WING<sup>®</sup>

## Pro

## No more annoying airflow, but comfortable ventilation.

Ordinary air conditioners can cause colds in summer,  
while in winter the air they produce is extremely dry.  
AIR WING provides you with the comfort of a well climatized,  
yet natural environment - be it your office, shop, or living room.

### For Any Season

Whether the airflow from the  
air conditioner is hot or cold,  
AIR WING will manage it in  
an effective way. A real  
advantage in all seasons.

### Dew Condensation Protection

This air conditioner blades  
are designed to stop  
annoying strong airflow and  
to protect dew condensation.  
The air blower, as well as  
the louver wingblades, are  
equipped with "Insulating  
Mat L".

### Easy to Install

Easy and can be one touch  
installation by adhesive tape  
with no damage of the existing  
air conditioner, wall and  
ceiling.

### Effective Ventilation

AIR WING is designed to  
distribute the air conditioner's  
airflow in an effective way. No  
more strong airflow feeling  
either too hot or too cold.

### Controllable Airflow

To direct the airflow in a specific  
direction, AIR WING can be  
individually adjusted. It can be  
turned back and forth by as  
much as 180 degrees, and also  
up and down.

For all types of  
air conditioners

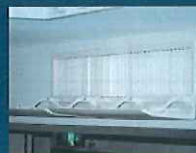

ceiling embedded cassette type

ceiling embedded round type

ceiling installed type

frontal blower type

floor level type

wall installed type

**One-touch  
Installation**

# Fresher air for your office, shop or living room!

**AIR WING Pro will stop the strong airflow of your air conditioner and distribute the air effectively all over the room.**

## Controllable Airflow

The arms can be turned back and forth by 180 degrees, and also up amount. This way, an individual ventilation is made possible.

Installing the AIR WING to a wall installed air conditioner (example) ▶

## Easy, One-touch Installation

Together with the included adapter, AIR WING can be installed to nearly all types of air conditioners (\*1). As drilling holes and using screws is not necessary, everyone can install AIR WING easily (\*2).

\*1 ceiling embedded cassette type / ceiling embedded round type / ceiling installed type / frontal blower type / floor level type / wall installed type

\*2 Please make sure to clean the place where the adapter is to be installed, using water and / or detergent. Please make sure no marks are left when installing the adapter.

▲ AIR WING adapter (\*3)

\*3 AIR WING adapter provided with adhesive tape for easy install to the existing air conditioner.

## For Any Season

Whether the airflow from the air conditioner is hot or cold, AIR WING will manage it in an effective way. A real advantage in all seasons.

**Cold Air**

**Hot Air**

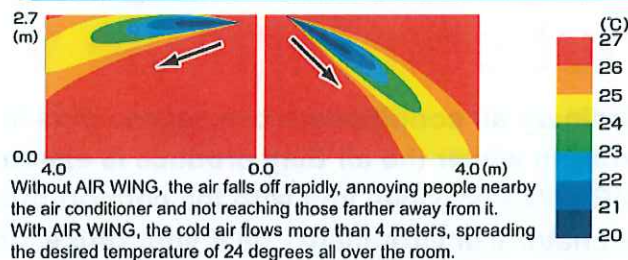

## Effective Ventilation

AIR WING distribute the air conditioner's airflow, hot or cold, in an effective way.

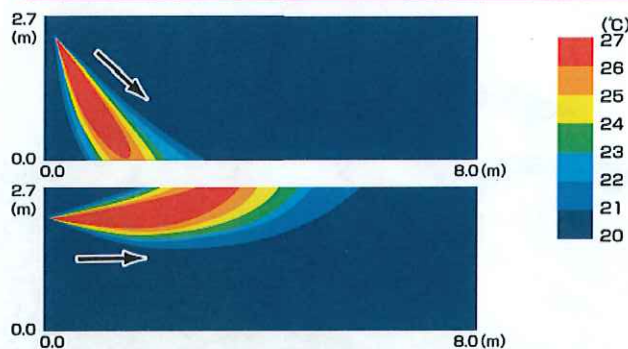

### Cold Air

■ Experiment with a ceiling embedded cassette type  
(Left: with AIR WING / Right: without AIR WING)

### Hot Air

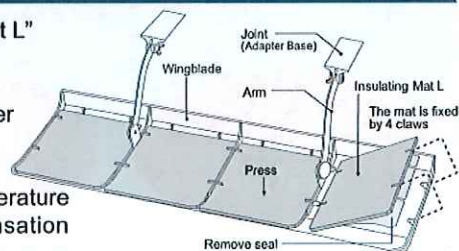

■ Experiment with a wall installed type  
(Upper image: without AIR WING / Lower image: with AIR WING)

## Dew Condensation Prevention

The "Insulating Mat L" designed specially for AIR WING is installed in the inner wingblades.

It buffers the difference in temperature and stops condensation there.
