

AIR WING

AIR WING SLIM

SLIM

Eliminates direct air stream from the air conditioner and assures equal distribution of air in the room.

If too cold in summer or excessively dry in winter, direct air stream from the air conditioner can negatively affect one's health. AIR WING SLIM distributes the air evenly and thus creates a more comfortable environment in offices, stores, or at home.

No more ugly cardboard covering your A/C

AIR WING SLIM

is simple & stylish!

For all seasons!

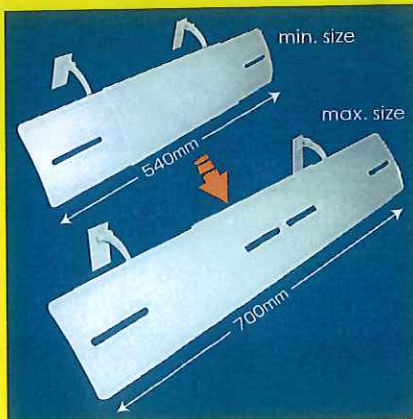

Both warm and cool air can be controlled by simply adjusting the AIR WING angle. Convenient all year round.

Corrugated surface design to
PREVENT CONDENSATION

Freely adjust air flow direction

Change the length of AIR WING to fit your air conditioner outlet size. Adjust it 180 degrees back and forth, or up and down, to freely control the air stream direction.

**Fits all A/C types!
Adjustable length**

The size of AIR WING is adjustable from 540mm to 700mm to fit your A/C outlet size. Compatible even with wide type A/C units.

Efficient air distribution

Eliminates direct wind blasts from the air conditioner and improves air circulation, creating an even temperature throughout the room.

One-touch installation

One-touch installation is so easy that anybody can do it. No screws or drilling is required, and there's no need to worry about damaging ceilings or walls.

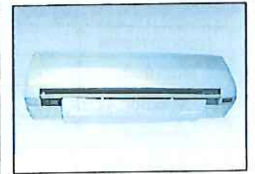

Works with all air conditioner types.

Ceiling cassette type

Ceiling suspended type

Home use wall mounted type

**Easy
one-touch
installation**

The adjustable length AIR WING can help you make your office, store or home more comfortable!

The adjustable length of AIR WING allows it to be attached to various types of air conditioner units. Eliminates direct hot & cool air stream and assures efficient air distribution to every part of the room.

Freely adjustable wind direction

The wing can be adjusted back and forth by 180°, or turned up and down, so you can freely regulate the air flow to any direction you like.

With a wall mounted type A/C

Easy one-touch installation

Comes with a special adapter that can be attached to most types of air conditioners *1. The one-touch installation is so easy that anybody can do it. No need to worry about screws or drilling holes into your walls or ceiling *2.

*1 Ceiling cassette type, ceiling suspended type, wall diffuser type, round diffuser type, floor-standing type, wall mounted type.

*2 Before attaching the adapter, clean the target surface well with a wet cloth or mild detergent and let it dry completely. In case of using a detergent, make sure to wipe it off completely with a wet cloth.

AIR WING SLIM special adapter

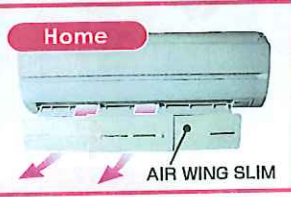

For all seasons

Both warm and cool air can be controlled by simply adjusting the AIR WING angle. Convenient all year round.

Cold Air

Hot Air

Designed to prevent condensation

The corrugated surface design helps to prevent condensation, even if there is a big difference between the room temperature and the A/C settings.

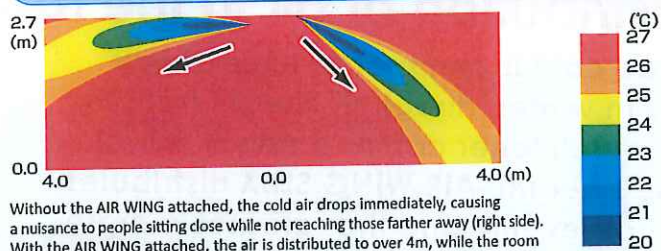

Efficient air distribution

The AIR WING series' capability to efficiently distribute both hot and cold air flow has been proven in experiments.

Cold Air

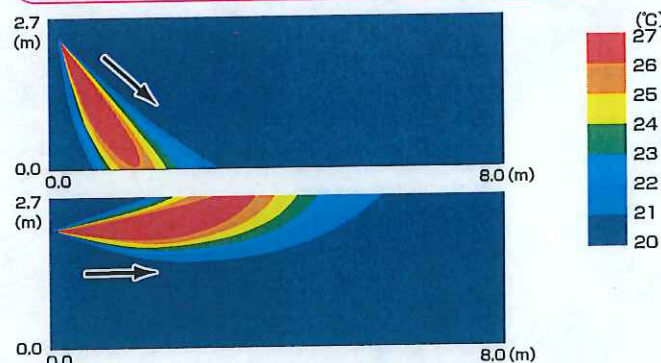

■ Experiment with ceiling cassette type air conditioner
(Left: With AIR WING Right: Without AIR WING)

Without the AIR WING attached, the cold air drops immediately, causing a nuisance to people sitting close while not reaching those farther away (right side). With the AIR WING attached, the air is distributed to over 4m, while the room temperature is kept evenly at about 24 °C (left side).

Hot Air

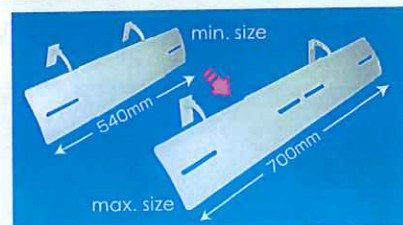

■ Experiment with wall mounted type air conditioner
(Upper Image: without AIR WING Lower Image: with AIR WING)

Without the AIR WING attached (upper image), warm air reaches only a 2m distance. People near the air conditioner get hit by a direct air stream that can cause dry skin, headaches and other problems. With the AIR WING attached (lower image), the heat is distributed up to 6m, assuring an equally heated room.

Adjustable length for any A/C type

The size of AIR WING is adjustable from 540mm to 700mm to fit your A/C outlet size. Compatible even with wide type A/C units.
